

Annex D: Lightwave: Isle of Light, empowered by OPPO

About Lightwave: Isle of Light

Embark on a specially constructed floating pontoon above the Marina Bay waterbody for a multi-sensory journey that will awaken your senses!

Visitors will traverse through an alternate universe comprising five unique zones with immersive features filled with imagination and creativity – from enchanting holographic projections, illuminated motion-capture graphics and shadow play, to light beams that remind one of a mystical forest – and be treated to a unique light art showcase that heralds new possibilities.

Mr Dylan Yu, Marketing Director of OPPO Singapore said, “i Light Singapore’s focus on raising awareness of sustainability is aligned with OPPO’s mission of ‘technology for mankind, kindness for the world’. We are excited to be part of the Festival for the second time as it returns after a two-year hiatus. Through Lightwave: Isle of Light, we hope to bring visitors an ethereal, multisensory light experience and allow photo fanatics to capture the allure of night. With the light installation shaped like a tunnel, we aim to create the feeling of excitement and wonder, as we emerge from the pandemic with the promise of new possibilities ahead.”

Tickets can be purchased from [Klook](#).

About the five zones

i light singapore

Presented by:  DBS

Zone 1: Through the Unknown

Glowing triangular structures welcome visitors, inviting them to explore new possibilities as they take the path less travelled.

Zone 2: The Seasons

A holographic mesh displays an enchanting projection depicting different moments in our lives through the four seasons.

Zone 3: Reflections

Lights and shadows will react to movements made in front of this interactive installation, which aims to inspire visitors to paint the world with their personalities.

Zone 4: The Prism

Visitors are invited to step into a prism with walls that reflect animation from a LED floor depicting the galaxy. The kaleidoscope-like visual effect conveys the different expressions that give the world its colours.

Zone 5: Forest of Lights

Colourful light tubes representing trees recreate the immersive experience of being in a forest, and remind visitors of the beauty and vibrancy that nature offers.
