OUR MISSION

To make Singapore a great city to live, work and play in.
The Urban Redevelopment Authority (URA) is Singapore’s national land use planning and conservation authority. URA’s mission is “to make Singapore a great city to live, work and play in”. We strive to create a vibrant and sustainable city of distinction by planning and facilitating Singapore’s physical development in partnership with the community.

The URA has successfully transformed Singapore into one of the most liveable cities in Asia through judicious land use planning and good urban design. We adopt a long term and comprehensive planning approach in formulating strategic plans such as the Concept Plan and the Master Plan, to guide the physical development of Singapore in a sustainable manner. Our plans and policies focus on achieving a balance between economic growth and a quality living environment. As the conservation authority, URA has an internationally recognised conservation programme, having successfully conserved not only individual buildings, but entire districts.

To turn its plans and visions into reality, URA takes on a multi-faceted role. In addition to our planning function, URA is also the main government land sales agent. Through the sale of state land, we attract and channel private capital investment to develop sites to support economic and social development. URA is also the development agency for Marina Bay, the new city extension. To create an exciting cityscape, URA also actively promotes architecture and urban design excellence.

Drawing on our experience in integrated planning and urban management, URA provides consultancy for overseas bilateral projects and shares our urban planning experience through professional training programmes.

---

Service • Passion • Integrity • Respect • Innovation • Teamwork

URA has a strong culture of achieving work excellence. This culture is anchored on the URA SPIRIT – core values which define what we believe in. They guide our daily interactions in the office and with our service partners and customers.
CHAIRMAN’S MESSAGE

Mr Peter Ho (right) took over from Mr Alan Chan (left) as URA Chairman from 1 April 2012

In this regard, the new growth areas at Jurong Lake District and Paya Lebar Central are shaping up well. The Jurong Lake District in the western part of Singapore, is envisioned to be a sustainable mixed use precinct for residents, we launched a webpage to facilitate the public engagement efforts, and to help the community understand our policies.

DEEPENING PUBLIC ENGAGEMENT

Urban planning is about people, as much as it is about land and infrastructure. How the community lives, works, and plays will significantly impact the way we plan for Singapore’s future urban environment. The community has been, and will continue to be an important partner in the URA’s work to create a high quality living environment.

Last year, we stepped up our engagement in the Rail Corridor project to seek ideas for the future development of the land area. To reach out to Singaporeans and residents, we launched a webpage to facilitate the contribution and discussion of ideas. The “Journey of Possibilities” Ideas Competition held last November was a success that attracted more than 200 proposals, with some coming from overseas. We also generated awareness among our youth through a series of workshops.

However, debate over developmental issues such as Bukit Brown shows that we need to work harder in our public engagement efforts, and to help the community appreciate the challenges of our land constraints and the difficult trade-off decisions.

The past financial year was a busy year where URA processed close to 12,000 development applications and about 3,000 change of use applications. To help businesses understand our technical requirements, we have initiated pre-consultation sessions to enable applicants to seek clarifications before submitting change-of-use applications. We also hold regular dialogue sessions to better explain our guidelines to professionals and businesses, and to obtain their input to better refine our policies.

A BIG THANK YOU

April 2012 marked the change in appointment of some Board members, including the Chairman of the Board. The last six years as URA Chairman had been an exciting and rewarding time for me. During this period, we saw the Marina Bay taking shape, and how Singapore transformed itself into a vibrant city-state much talked about all over the world. I am proud and privileged to be associated with URA.

My best wishes go to the new Chairman, Mr Peter Ho Hak Ee, and the new Board members. Under their leadership, I am confident that the URA will contribute towards Singapore’s growth and success.

On behalf of the Board and staff of the URA, I would like to thank all our friends for your support in our mission to make Singapore a vibrant and prosperous city. It is only with your support that we can collectively plan a brighter future for Singapore.

Chan Heng Loon Alan
Chairman

INTERNATIONAL PANEL OF EXPERTS

This panel was established to seek the views of renowned international architects, urban economists, planners and developers on international best practices and the latest global trends in planning and urban design strategies. As such, the panel advises on international best practices and trends in planning and urban design, and development strategies of cities around the world. It also provides feedback on planning and urban design issues identified by URA, as well as identifies ways to encourage and promote innovative architecture and urban design in Singapore.

DESIGN GUIDELINES WAIVER COMMITTEE

This committee considers and advises URA on whether appeals for waivers from URA’s urban design guidelines and standard development control requirements can be supported. It considers how the buildings will enhance our urban landscape and skyline in waiving some of these guidelines for innovative and quality building designs.

INFORMATION SYSTEMS GROUP
Director
Peter Quek

Information System Application and Infrastructure
- Design and implement strategic IT systems
- Maintain reliable and secured IT infrastructure
- Provide responsive IT end user operation
- Explore and exploit new IT technology
CORPORATE GOVERNANCE

The URA Board and Management have put in place a framework to ensure adherence to good corporate governance practices.

URA BOARD

The URA Act provides for URA to have a Chairman and up to 12 other Board members. The Board members are individuals from both the public and private sectors. Hailing from wide-ranging fields of architecture, media, finance, academia and government, the members provide complementary expertise and depth of experience to the Board. Other than URA CEO, who is also a Board member, the rest are non-executive members.

STAFF REVIEW COMMITTEE III

The Staff Review Committee III consists of URA Chairman, CEO and one other Board member. It reviews and endorses the promotion of officers into and within superscale grades, and reviews and approves the recruitment of superscale officers.

FINANCE & INVESTMENT COMMITTEE

The Finance & Investment Committee is chaired by the URA Chairman and includes three other Board members and one non-Board member. The Committee reviews and recommends policies on the investment of surplus funds for the Board’s or Minister’s approval, as well as considers and approves investment guidelines in line with policies approved by the Board. The Committee reviews the appointment of fund managers, custodians, and investment consultants and related service providers. Besides reviewing the annual budget for the Board’s endorsement, the Committee also reviews changes to the Financial Operation Manual for the Board’s approval.

AUDIT COMMITTEE

The Audit Committee (AC) is chaired by a non-executive Board member and includes two other Board members. The main function of the AC is to assist the Board in discharging its statutory and oversight responsibilities. It meets with URA’s internal and external auditors to review their audit plans, observations, and the annual audited financial statements. It also reviews, with the internal and external auditors, the results of their evaluation of URA’s internal control systems.

INTERNAL CONTROL FRAMEWORK

URAs internal control framework aims to ensure that assets are properly safeguarded, accounting systems and controls are sound and effective, financial information is reliable and key computerised systems are adequately secure to minimise our risks.

These objectives are achieved through:

- Management’s emphasis on the importance of good governance and an organisational culture that is conscious of the need for internal control and risk management;
- An organisation structure with clear definition of responsibility and reporting at different levels of the organisation;
- Established communication channels through regular staff seminars, staff circulars, orientation briefings and provision of comprehensive information in URAs intranet to educate staff on internal controls and good governance;
- A Financial Operation Manual, which sets out the internal control and financial policies, procedures and financial authority relating to key operations of URA;
- Careful selection and deployment of staff, with regular reviews to ensure there is appropriate segregation of duties and that personnel are not assigned conflicting responsibilities;
- Independent internal and external auditing functions;
- Adoption of Singapore Government Security Instructions for the Handling and Custody of Classified Documents and Government Instruction Manual on Information Technology to ensure proper use and safeguarding of URAs information;
- Close monitoring of URAs financial risk exposure and implementing measures to minimise risk; and
- Monitoring of monthly and quarterly reporting of financial and operational performance of key activities by Management and the Board.

BUSINESS AND ETHICAL CONDUCT

All staff of URA are bound by URAs terms and conditions of service to maintain a high standard of business and ethical conduct. In the course of their official duties, they are obliged not to involve themselves in matters where a conflict of interest may arise and are to declare the situation to their supervisor. They are also obliged to comply with established guidelines pertaining to the acceptance of gifts and invitations from contractors, suppliers, clients, customers, developers and any member of the public.

In addition, all staff members are subject to provision of the Official Secrets Act and the Statutory Bodies And Government Companies (Protection of Secrecy) Act. They are required to sign a declaration upon recruitment to acknowledge this provision, and are reminded of this provision when they leave URAs service.

URA has also put in place a Whistle Blower Policy Statement to strengthen its business and ethical conduct.

RISK MANAGEMENT PRACTICES AND INTERNAL CONTROLS

The Finance & Investment Committee is chaired by the Chairman, CEO and one other Board member. It reviews and approves the annual budget for the Board’s approval, as well as considers and approves investment guidelines in line with policies approved by the Board. The Finance & Investment Committee reviews the appointment of fund managers, custodians, and investment consultants and related service providers. Besides reviewing the annual budget for the Board’s endorsement, the Finance & Investment Committee also reviews changes to the Financial Operation Manual for the Board’s approval.

The Staff Review Committee III consists of URA Chairman, CEO and one other Board member. It reviews and endorses the promotion of officers into and within superscale grades, and reviews and approves the recruitment of superscale officers.

ACHIEVEMENTS FOR THE YEAR
In planning for the physical development of Singapore, the URA continually strives to maintain a good balance between supporting economic growth and maintaining a high quality living environment by seeking innovative urban solutions.

Three regional growth areas - Kallang Riverside, Paya Lebar Central and Jurong Lake District, had been identified in Master Plan 2008 as part of the URA’s decentralisation strategy to develop mixed-use hubs outside the city centre to bring jobs and recreational facilities closer to home.

**Kallang Riverside**

The Kallang Riverside Working Group has been formed to drive future developments and promote the area as a premier waterfront lifestyle destination to potential stakeholders.

Co-chaired by the URA and Economic Development Board (EDB), the working group is looking at developing Old Airport Square for retail, entertainment and sports-related uses to complement the nearby Singapore Sports Hub.

To leverage on the precinct’s waterside location, a hydrology and landscaping consultancy study has also been initiated by the URA to incorporate Water Sensitive Urban Design features in the masterplanning of Kallang Riverside. The outcome of the consultancy will also provide inputs to the landscape and urban design guidelines for the sites within the precinct.

**Paya Lebar Central**

The URA is part of a multi-stakeholder workgroup chaired by Mayor (South East District) & Senior Parliamentary Secretary (Defence & National Development) Dr Mohamad Maliki Osman to oversee the consultation, conceptualisation and implementation of the Geylang Serai precinct.

A new civic centre has been planned to anchor the area. To be named Wisma Geylang Serai, it will house a Malay Heritage Gallery, the Geylang Serai Community Club, Southeast Community Development Centre and arts-related groups.

In addition, the URA chaired a sub-group to seek ideas on applying appropriate architecture and urban design principles to the area, to ensure the existing character is retained and enhanced even as the area undergoes redevelopment.

**Jurong Lake District**

The Jurong Lake District is turning out to be an exciting area with a number of new eco-friendly developments taking shape around the Jurong East MRT Station. These include Jem, a retail-cum-office development that will house the MND; JCube, a mall housing Singapore’s first Olympic-sized ice skating rink and Westgate, a lifestyle mall and office tower.

The Ng Teng Fong General Hospital and Jurong Community Hospital, an integrated healthcare hub and the Devan Nair Institute for Employment and Employability, one of two National Continuing Education and Training Campuses for skills training and career opportunities – are also being built to serve the population in western Singapore.

To support the momentum of growth and strengthen its position as an attractive business location, a residential site and a hotel site in the district had been included in the 1H2012 Government Land Sales (GLS) programme under the Reserve List.

Jurong Lake District has been identified by the URA and EDB as a Living Laboratory where companies, businesses and research institutions can partner agencies to test-bed innovative sustainable urban solutions for high-density mixed-use developments.

The URA is mindful to retain and reflect the existing cultural heritage of the Geylang Serai precinct even as we seek to redevelop the area.

**Supporting growth**

To support the growth of these three areas, the URA works with partner agencies to ensure key infrastructures are developed in time to support upcoming developments. These include roads, drains and sewers at Kallang Riverside, and electrical sub-stations at Toh Guan Road, Sims Avenue and Jalan Eunos.

The URA also started street improvement works along Geylang Road to provide more space for the annual Hari Raya Bazaar; a feature of Geylang Serai.
The URA implements improvement works to enhance Singapore’s living environment. These include projects that strengthen the character and identity of selected areas, improve connectivity between major nodes and which create more leisure options.

### Balestier

To enhance Balestier’s physical environment, more parking spaces were added at the Minbu Road car park. Drains were covered up as footpaths, sidewalks widened and the walkways finished with non-slip terra cotta tiles to make the area more pedestrian-friendly. Together with newly installed storyboards and heritage markers, these improvement works celebrate the rich history and old world charm of Balestier.

### Bras Basah Bugis

To strengthen Bras Basah Bugis as an enclave for arts, entertainment, learning and culture, plans are underway to create wider, more colourful sidewalks, lush tree planting, new street furniture and street lighting at Queen Street. These plans were publicly exhibited in March 2012 and received strong support from local residents and stakeholders. The wider sidewalks will allow the arts and cultural institutions in the area to better organise outdoor street events.

### Labrador Nature and Coastal Walk

The URA also completed and opened the Labrador Nature and Coastal Walk, an exciting recreational loop that links the Southern Ridges, Labrador Nature Reserve, and the waterfront promenades along Keppel Harbour, VivoCity and Sentosa, in January 2012.

### Kranji Marshes

To study how the Kranji Marshes can be sensitively enhanced and developed into an educational nature destination, the URA carried out a bio-diversity impact assessment.

### Punggol Promenade

Residents in north eastern Singapore now have more leisure options with the completion of a 4.9 km Punggol Promenade. URA had embarked on the project to open up the north-eastern coastline for all to enjoy.

Punggol Point Walk and Punggol Point Park were launched in November 2011 by Deputy Prime Minister Teo Chee Hean. The last segment, Nature Walk was opened in February 2012. The URA had worked closely with the grassroots to incorporate their suggestions into the design for the Punggol Promenade project to create a quality living environment.
Through the planning and development control system, the URA ensures that all properties in Singapore are developed and used according to the Master Plan planning intentions and development control requirements. The URA seeks to protect the amenity and interests of the larger community while facilitating the needs of individual landowners and businesses. The URA reviews its services and processes regularly to ensure that they remain relevant to changing times and technologies. The URA also ensures that infrastructures are built in time to support upcoming developments in selected growth areas.

Providing better services

To support a more pro-business environment, the URA introduced automatic renewal for Temporary Permission for straight-forward change of use proposals that do not cause any amenity problems to the surrounding area. The initiative removes the hassle of having to fill up application forms on time for renewal and was warmly welcomed by business operators. To reduce business costs, the URA reduced processing fees for change of use applications, renewals and other related applications by more than 50 per cent in April 2011.

To protect the quality of the living environment, the URA has introduced measures such as ensuring minimum plot size and limiting number of dwelling units within low density residential estates

In another effort to improve productivity and simplify processes, the URA exempted the requirement to obtain change of use permission for commercial premises leased and sold by the Housing & Development Board (HDB) in February 2011. This initiative makes it easier for applicants as they now only have to deal with one agency (HDB instead of two previously (HDB and URA) and much time, efforts and fees can be saved.

URA introduced a free consultation service in November 2011 for anyone who is considering changing the use of a property – to have face-to-face discussions with our planners before making their applications for approval. The consultation service allows a proposed business use or activity to be discussed first to get a quick indication of whether it will be allowed in certain locality. The service has been well received.

In January 2012, the URA collaborated with the Council for Estate Agencies (CEA) to conduct an inaugural seminar on change of use guidelines to raise greater awareness on the do’s and don’ts of change of use to property as part of the URA and CEA’s efforts to raise industry standards for estate agents.

The URA received 14,800 Development Applications, including 3,000 change of business uses in FY 2011. 96 per cent of these applications were cleared by the URA within the four-week time-frame. For Legal Requisition (LR), 34,856 LRs were received in FY 2011. 98 per cent of these LRs were cleared within three days.

To ensure that our plans and planning objectives are realised, URA carried out enforcement actions on 4,500 cases in FY2011 following public feedback.

Developing infrastructure

In Marina Bay, infrastructure works such as the Common Services Tunnel, sewers and an electrical substation were completed to facilitate the seamless expansion of the Central Business District (CBD). A new barrier-free pedestrian bridge adjacent to the Esplanade Theatres will be constructed to improve accessibility along the waterfront.

URA’s plans to rejuvenate the CBD into a vibrant live-work-play environment continues to be realised with the redevelopment of Market Street Car Park into a Grade A office tower and the sale of the White site at Peck Seah Street / Choon Guan Street for a mixed-use development.

Given the increasing demands on the transportation network, the URA together with the Land Transport Authority (LTA) and Singapore Land Authority (SLA) have planned for the development of additional expressways to serve the island.

The construction of the Marina Coastal Expressway (MCE) will be a key element in the island-wide road network to support long term growth. When the MCE is in place to take the traffic from the ECP and the Ayer Rajah Expressway, more of the planned roads in Marina Bay will be progressively realised to open up the rest of the area for development.

The development of Singapore’s eleventh expressway, the North-South Expressway will also serve the long term growth in travel demand generated in the north and north-eastern sectors of Singapore.
ENGAGING THE COMMUNITY

The URA believes in continued engagement and involvement of the public and stakeholders in carrying out its work as the planning and conservation authority.

Deepening community partnership

The return of the railway land previously occupied by Keretapi Tanah Melayu presented the URA with a unique opportunity to involve the public in conducting a comprehensive review of plans for the land and its surrounding areas.

Taking a ground-up approach, the URA and Ministry for National Development (MND) formed the Rail Corridor Consultation Group (RCCG). The RCCG, comprising interested individuals and NGOs such as the Nature Society Singapore and Singapore Heritage Society, provided inputs to chart the Rail Corridor public engagement programme.

To allow the public to experience the tracks and surrounding areas, the URA worked closely with other government agencies to open the Rail Corridor to the public before the tracks were removed.

The URA also supported the “Re-imagining the Rail Corridor” exhibition and workshop organised by Friends of the Rail Corridor, an NGO in the consultation group. The exhibition showcased interesting ideas for the future of the Rail Corridor by architecture and landscape students as well as design professionals.

In November 2011, the URA launched “Journey of Possibilities” – an ideas competition to draw bold, innovative and new ideas from the public in addressing key challenges and issues in planning for the Rail Corridor. Suggestions on the future use of the railway land were then jointly reviewed by the URA and RCCG.

To further strengthen public–people sector collaboration, the role of the RCCG was expanded in May 2012 to include programming and promotion of community activities along the Rail Corridor. It was renamed the Rail Corridor Partnership.

The Rail Corridor Public Engagement Exercise is one of the URA and MND’s most extensive public engagement exercise to-date.

Besides the Rail Corridor Project, the URA also worked closely with the community in the documentation of graves affected by a proposed new road at the Bukit Brown cemetery.

The URA co-funded the project and chaired an Advisory Committee comprising relevant stakeholders from heritage groups and government agencies to assist and guide the documentation work, which was done by a team of volunteers led by Dr Hui Yew-Foong - Fellow and Coordinator of the Regional Social and Cultural Studies programme at the Institute of Southeast Asian Studies.

Dialogue with Community Leaders

In April 2012, the URA held the inaugural run of the URA Dialogue Series with Community Leaders. This was jointly organised with the People Association’s National Community Leadership Institute to share with grassroots leaders the challenges in planning for Singapore as well as how to better manage the increasing trend of “not-in-my-backyard syndrome” amongst local communities.

The participants found the dialogue to be very informative and useful and participated enthusiastically during the discussions. The session ended with a site visit to Marina Bay and participants gained a better understanding and appreciation of some of the latest developments in our city. Subsequent runs are scheduled for 2012.

JOURNEY OF POSSIBILITIES

IDEAS COMPETITION FOR THE RAIL CORRIDOR

The historic Tanjong Pagar and Bukit Timah Railway Stations have been retained, while around 50km of railway land stretching from Tanjong Pagar to Woodlands provides the URA with an opportunity to get the public involved in its development plans.

The jubilant Rail Corridor team and helpers at the launch of “Journey of Possibilities” exhibition.

The jubilant Rail Corridor team and helpers at the launch of “Journey of Possibilities” exhibition.
Broadening outreach efforts

The URA’s public outreach efforts were given a boost with the official opening of the newly upgraded Singapore City Gallery in August 2011 by Senior Minister of State for National Development, Mr Lee Yi Shyan. Designed with state-of-the-art and highly interactive exhibits, the new gallery brings visitors on a multisensory journey into Singapore’s planning history. It is also an important channel through which the URA continually inspires and engages people on Singapore’s planning challenges.

To deepen engagement with the online community, the URA launched in April 2012, Going Places Singapore; an online magazine about appreciating our city anew. Presenting URA’s work in a different light, the magazine offers an insider’s look into familiar neighbourhoods, favourite spaces and lesser known places in Singapore.

The URA also expanded its communication platforms to include digital and online tools to complement traditional media platforms with the setting up of the URA Facebook, Twitter and YouTube accounts in 2011.

Through the URA school outreach programme, we engage young minds on understanding the constraints in our urban environment and how they can contribute to a better living environment.
The URA understands and respects the need to balance urbanisation and redevelopment with the conservation of our collective memories. Through our Conservation Programme, we safeguard physical manifestation of our past for the benefit of the next generation. Since 1990, the URA has been actively identifying buildings and structures for conservation. As at end of 2011, there were over 7,091 conserved buildings and structures in Singapore.

The history, policies and challenges that shape the conservation of our built heritage have now been captured in a book titled “Conserving the Past, Creating the Future: Urban Heritage in Singapore”. Launched in April 2011, the book serves as an encouragement to those involved in the conservation efforts, to continue to preserve our past.

Recognising efforts

The URA continues to honour and recognise owners, professionals and contractors who had taken the extra effort to sensitively restore their buildings to modern use. At the 17th Architectural Heritage Awards 2011 award ceremony in October 2011, seven teams received the award by Senior Minister of State for National Development Mr Lee Yi Shyan.

The seven projects included six two-storey transitional style shophouses at 9, 11, 13, 15, 17 and 19 Kreta Ayer Road, a four-storey 1950s Art Deco style building redeveloped into the Wanderlust Hotel at 2 Dickson Road, refurbishment of Clifford Pier building and Customs House into a food and beverage establishment (Fullerton Heritage), the restoration of a three-storey Neo-Classical style building into Hotel Fort Canning at 11 Canning Walk, a two-storey pre-war transitional terrace house at 123G Caimhll Road and a two-storey shophouse at 19 Lorong 24A Geylang. With these seven winners, the total number of projects that had received the awards rose to 107.

FY 2011 also saw many iconic and significant buildings being conserved by the URA, including the iconic Tanjong Pagar Railway Station and Bukit Timah Railway Station and selected buildings along Cantonment Road and Mount Sophia. Two significant steel bridges at Dunearn Road and Upper Bukit Timah Road, together with about 400 metres of tracks were also retained. Three schools were given conservation status in October 2011, including the former Chong Cheng School at Allwalk Street, the former Anglo-Chinese School at Caimhll Road and the modern block of the former St Anthony’s Convent at Middle Road. These buildings with their distinctive facades will continue to remain as familiar and memorable landmarks.

Reviewing guidelines

The URA also carried out a review of the Conservation Guidelines in 2011, which is conducted every five years to ensure that the guidelines remain relevant. The guidelines provide guidance to assist building professionals and owners in carrying out restoration works to conserved shophouses and bungalows. The revised guidelines introduced in November 2011, will further protect special characteristics of conservation buildings and areas while allowing flexibility for adaptive reuse. The review was conducted in consultation with various professional bodies and stakeholders to ensure that the revision took into consideration all relevant feedback and suggestions.
Planning for a sustainable and liveable environment requires us to explore and share innovative solutions for urban living and encourage good architecture and urban design. These enhance our quality of life and Singapore’s attractiveness to the global community.

Promoting architecture excellence

“20 Under 45: The Next Generation” exhibition showcasing the works of 20 young emerging Singapore architects under the age of 45, was presented at the prestigious architectural and urban design Aedes Architecture Forum Gallery in Berlin, Germany from March 2011 to May 2011.

As part of our continued efforts to promote architectural and urban design excellence, the URA in collaboration with Pritzker Prize-winning British Architect Richard Rogers and his practice, presented the “Richard Rogers & Architects: From the House to the City” exhibition in May 2011. Richard Rogers and his partners Graham Stirk and Ivan Harbour also shared their design philosophies and insights through a public lecture organised by the URA.

The third challenge for the Urban & Built Environment 2011 (UBBE) was held from 30 May to 3 June 2011 to offer students a chance to delve into the intricacies of planning and gain first-hand experience as urban planners. A hundred students from 13 Junior Colleges and Polytechnics participated in the workshop cum competition. Their proposals were exhibited at the URA Centre and various regional libraries around Singapore.

To foster continued research and innovation, the URA co-organised the inaugural Urban Sustainability R&D Congress with MND in June 2011. This two-day event brought together 819 participants from the public sector, private sector and academia to exchange ideas on R&D challenges related to urban sustainability and to facilitate research collaboration opportunities.

The URA also collaborated with Singapore Urban Sketchers group to present the “Urban Sketchers Singapore: Volume 01” book and exhibition in October 2011. The sketches serve as a way to capture moments and memories of places and events in Singapore. Sketch walks, organised in conjunction with the launch of the book, were warmly received by the public.

The Architect 2011 organised by the Singapore Institute of Architects (SIA) and supported by the URA, played a significant role in providing a platform for the discussion of quality architecture that shapes our physical environment. The month-long festival was concluded successfully in October 2011.

Into its sixth year, the President’s Design Award 2011 continued to honour the achievements and contributions of designers and design that made a difference to the lives of Singaporeans. 12 designers and designs were conferred the award by the President of Singapore, Dr Tony Tan in November 2011.

In March 2012, the Lee Kuan Yew World City Prize 2012 was awarded to the Mayor of New York City, Michael Bloomberg and the Departments of Transportation, City Planning and Parks and Recreation. In a lecture to 400 government and industry leaders, Mayor Bloomberg shared New York City’s remarkable transformation from one at risk in the post September 2011 period to one scaling new heights.

Encouraging professional exchange

The URA also organises regular talks and seminars for the industry to ensure that we raise the standards and quality of professionals in Singapore. This is conducted through regular forums such as the URA Speaker Series which bring in influential people in the architecture and urban planning industry as speakers.

FYI! - a new series of talks, exhibitions and other events was launched in February 2012 as an alternative to the Speaker Series. The FYI! targets a broader audience and is inspired by people’s interest in cities, culture, heritage and design.

In March 2012, the URA also conducted the inaugural urban planning seminar, “Urban Transformations” which showcased the variety and depth of planning and urban design works that Singaporean consultancy firms have done around the world. The seminar was complemented by an exhibition at the URA Centre, as well as the publication of a catalogue for sale. These initiatives create platforms for our local planning professionals to share best practices, learn from one another and raise the quality of the urban planning profession and industry as a whole.

Training professionals

Beyond Singapore, the URA continues to be actively involved in the Sino-Singapore Tianjin Eco-city project. The URA also works with our local firms to provide consultancy services for overseas master planning projects such as the Chongqing Liangjiang Advisory project in China and the Al Wakra Downtown project in Qatar.

Customised training programmes were conducted in Phnom Penh for officials from the Cambodia Ministry of Land Management, Urban Planning and Construction, and for government officials from Liaoning H Autonomous Prefecture.

The URA hosted and trained more than 2,500 delegates from some 22 countries in 2011. The URA also conducted three runs of its Integrated Land Use Planning course which shared our planning experience with both local and foreign planning professionals and government officers, thereby completing the 8th successful run in February 2012 since its inception in 2009.

The URA understands that the documentation of key case histories is important for knowledge retention and training within the organisation. Since 2010, the URA has written a total of 46 narratives on all aspects of URA work. All these narratives are stored in an online repository that makes it easy for officers to access the case histories and glean useful lessons from them to be put to use in their work. The narratives are also incorporated into training and induction programmes for new staff.
As the development agency for Marina Bay, the URA spearheads Singapore’s future development efforts at Marina Bay, taking a holistic approach to master plan, implement key infrastructure and promote investment opportunities. It also place manages the Bay by promoting and organising activities that support the vision of turning Marina Bay into a People’s Bay.

A record 23 million people visited Marina Bay in 2011, attracted by the wide range of leisure and entertainment options available at this spectacular waterfront location designed with attractive and delightful public spaces for all to enjoy.

Organising events

Anchoring the community events at the Bay is The Esplanade – Theatres on the Bay, which was opened by the URA in 2010, welcomed its 100,000th visitor in September 2011. Since its opening, the gallery has reached out and played host to many schools, community groups and visitors.

Reaching out to the public

The Marina Bay City Gallery which was opened by the URA in 2010, welcomed its 100,000th visitor in September 2011. Since its opening, the gallery has reached out and played host to many schools, community groups and visitors.

Upcoming developments

The year also saw the Marina Bay precinct fast evolving into a financial hub that promises to give Singapore a competitive edge over other regional financial centres.

The opening of the first phase of Gardens by the Bay in 2012 will ensure a green lung in the heart of the city and reaffirm the commitment to make Singapore into a City in a Garden. The completion of the 100,000 sqm Marina Bay Cruise Centre Singapore means that Singapore will be able to handle the world’s largest cruise ships and make Marina South another gateway to Singapore.

Other new developments that will further strengthen Singapore as a regional financial hub include Tower 3 of the Marina Bay Financial Centre, Asia Square Tower 2, and future developments in Marina South and Ophir-Rochor by M+S Pte Ltd, a joint venture between Khazanah Nasional Berhad, Malaysia’s investment company and Singapore’s Temasek Holdings.

Creating A People’s Bay

As the development agency for Marina Bay, the URA spearheads Singapore’s future development efforts at Marina Bay, taking a holistic approach to master plan, implement key infrastructure and promote investment opportunities. It also place manages the Bay by promoting and organising activities that support the vision of turning Marina Bay into a People’s Bay.

A record 23 million people visited Marina Bay in 2011, attracted by the wide range of leisure and entertainment options available at this spectacular waterfront location designed with attractive and delightful public spaces for all to enjoy.

Facilitating more activities

To enhance visitor experience at the Marina Bay waterfront throughout the year, the URA partners local performing arts groups and schools to launch “Rhythms by the Bay” – a regular series of free concerts and performances on the last Saturday of each month at the Marina Bay waterfront promenade.

Activating the Bay as a water sports arena, the URA introduces year round sailing programmes at the Bay. This brings the sport closer to the masses and enriches the Bay with the visual spectacle of sailboats cruising in its waters.

Organising events

Anchoring the community events at the Bay is The Esplanade – Theatres on the Bay saw the community embracing Marina Bay as their favourite spot to celebrate the year-end festive season.

For the first time, the Bay was turned into a place for giving with 20 beautiful Norfolk Pines dotting the waterfront promenade. These Christmas trees were brought in by the URA and the Community Chest to raise funds for the less fortunate. Named “Chari-trees”, they helped to raise $132,000 for charity.

A record 565,000 people visited i Light Marina Bay 2012 – a meaningful light arts festival that advocates the use of energy-efficient lighting technology. Into its second year, the event organised by the URA, provided a platform for visitors to explore and appreciate Singapore’s signature waterfront through more than 36 visually stunning and sustainable light art installations placed around the Bay. This edition also saw more community partners such as the People’s Association as well as the Central Singapore and South East Community Development Councils getting involved by providing an array of outdoor activities for everyone’s enjoyment.

The year also saw the Marina Bay precinct fast evolving into a financial hub that promises to give Singapore a competitive edge over other regional financial centres.

The opening of the first phase of Gardens by the Bay in 2012 will ensure a green lung in the heart of the city and reaffirm the commitment to make Singapore into a City in a Garden. The completion of the 100,000 sqm Marina Bay Cruise Centre Singapore means that Singapore will be able to handle the world’s largest cruise ships and make Marina South another gateway to Singapore.

Other new developments that will further strengthen Singapore as a regional financial hub include Tower 3 of the Marina Bay Financial Centre, Asia Square Tower 2, and future developments in Marina South and Ophir-Rochor by M+S Pte Ltd, a joint venture between Khazanah Nasional Berhad, Malaysia’s investment company and Singapore’s Temasek Holdings.

PLACE-MAKING SINGAPORE

Building on its success in place-making Marina Bay, the URA, together with the Singapore Tourism Board, National Arts Council, and National Heritage Board, drew up a National Place Management Framework to chart the direction of place management efforts in Singapore over the long term.

Singapore River

As the agency championing the place management of the Singapore River, the URA worked with the Singapore River One Task Group, formed in 2010 and comprising private and public sector stakeholders, to make the Singapore River more vibrant and attractive to visitors.

Key initiatives launched by the taskforce and supported by the URA included the Singapore River Logo Design Competition in February 2012 and the “A Better Singapore River – Good Businesses Don’t Tout or Overcharge” campaign in December 2011.

Beyond shaping the hardware and software of Singapore, the URA continues to play an important role in maintaining a stable and sustainable property market.

Ensuring ample supply

Through a responsive Government Land Sales (GLS) Programme, the URA ensured that there was adequate supply of land to meet the strong demand for private housing.

In total, 36 residential sites (including seven EC sites) that can yield 17,175 residential units (including 4,140 EC units) were placed on the Confirmed and Reserve Lists in the GLS Programmes in the second half of 2010 and the first half of 2011.

As at end 2011, there was about 902,000 sqm GFA of space that can cater to businesses which do not need a CBD location.

In all, 19 residential sites, 3 commercial sites, 2 commercial & residential sites, 1 hotel site, 1 white site and 8 industrial sites were sold by the URA in FY 2011.

STABILISING THE PROPERTY MARKET

Beyond shaping the hardware and software of Singapore, the URA continues to play an important role in maintaining a stable and sustainable property market.

Ensuring ample supply

Through a responsive Government Land Sales (GLS) Programme, the URA ensured that there was adequate supply of land to meet the strong demand for private housing.

In total, 36 residential sites (including seven EC sites) that can yield 17,175 residential units (including 4,140 EC units) were placed on the Confirmed and Reserve Lists in the GLS Programmes in the second half of 2010 and the first half of 2011.

As at end 2011, there was about 902,000 sqm GFA of office space in the pipeline to support business needs. To support our businesses and economic growth, the URA continued to make available adequate supply of commercial space. A significant portion of this supply is located in Jurong Gateway and Paya Lebar to provide opportunity for the development of more affordable office space that can cater to businesses which do not need a CBD location.

In all, 19 residential sites, 3 commercial sites, 2 commercial & residential sites, 1 hotel site, 1 white site and 8 industrial sites were sold by the URA in FY 2011.

Enhancing stability and transparency

The URA also introduced several key property market policies to enhance stability and transparency in the property market.

In December 2011, the Additional Buyer’s Stamp Duty (ABSD) was introduced to moderate investment demand for private residential properties so as to ensure a more stable property market.

A review of the Housing Developers (Control & Licensing) Act (HDCLA) and Housing Developers Rules (HDR) was also carried out to enhance market transparency. Public feedback was sought on how the URA can help buyers make better informed decisions when buying a home. Improvements to the HDR which now requires developers to provide more comprehensive and detailed information to home-buyers were implemented earlier in 2012. Improvements to the HDCLA will be implemented by the end of the year.
BUSINESS & ORGANISATIONAL AWARDS
(Covering the period 1 April 2011 - 31 March 2012)

2011 BCA Award
for Henderson Waves and The Helix Bridge

for significant contribution to the Community Chest

FINANCIAL REPORT
For the financial year ended 31 March 2012

INDEPENDENT AUDITOR’S REPORT 38
STATEMENT OF FINANCIAL POSITION 40
STATEMENT OF COMPREHENSIVE INCOME 41
STATEMENT OF CHANGES IN CAPITAL AND RESERVES 42
STATEMENT OF CASH FLOWS 43
NOTES TO THE FINANCIAL STATEMENTS 44
INDEPENDENT AUDITOR’S REPORT TO URBAN REDEVELOPMENT AUTHORITY

REPORT ON THE FINANCIAL STATEMENTS

We have audited the accompanying financial statements of Urban Redevelopment Authority (the "Authority") set out on pages 40 to 69, which comprise the Statement of Financial Position as at 31 March 2012, Statement of Comprehensive Income, Statement of Changes in Capital and Reserves and Statement of Cash Flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

MANAGEMENT’S RESPONSIBILITY FOR THE FINANCIAL STATEMENTS

Management is responsible for the preparation and fair presentation of these financial statements in accordance with the provisions of the Urban Redevelopment Authority Act (Cap. 340) (the "Act") and Statutory Board Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

AUDITORS’ RESPONSIBILITY

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Singapore Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

OPINION

In our opinion, the financial statements of the Authority are properly drawn up in accordance with the provisions of the Act and Statutory Board Financial Reporting Standards so as to present fairly, in all material respects, the state of affairs of the Authority as at 31 March 2012, and the results, changes in capital and reserves and cash flows of the Authority for the financial year ended on that date.

EMPHASIS OF MATTER

We draw attention to Note 6 to the financial statements. At 31 March 2012, the Authority has capitalised $51,924,000 (31 March 2011: $40,426,000) relating to infrastructural projects-in-progress. These amounts are recognised as an asset on the Authority’s Statement of Financial Position as its accumulated surplus is used to fund these projects. On completion of the infrastructural projects, the assets will be transferred to the designated government agencies as a contribution to the government, with a corresponding reduction against the Authority’s accumulated surplus. Our opinion is not qualified in respect of this matter.

REPORT ON OTHER LEGAL AND REGULATORY REQUIREMENTS

MANAGEMENT’S RESPONSIBILITY FOR COMPLIANCE WITH LEGAL AND REGULATORY REQUIREMENTS

Management is responsible for ensuring that the receipts, expenditure, investment of moneys and the acquisition and disposal of assets, are in accordance with the provision of the Act. This responsibility includes implementing accounting and internal controls as management determines is necessary to enable compliance with the provisions of the Act.

AUDITOR’S RESPONSIBILITY

Our responsibility is to express an opinion on management’s compliance based on our audit of the financial statements. We conducted our audit in accordance with Singapore Standards on Auditing. We planned and performed the compliance audit to obtain reasonable assurance about whether the receipts, expenditure, investment of moneys and the acquisition and disposal of assets, are in accordance with the provisions of the Act.

Our compliance audit includes obtaining an understanding of the internal control relevant to the receipts, expenditure, investment of moneys and the acquisition and disposal of assets; and assessing the risks of material misstatement of the financial statements from non-compliance, if any, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Because of the inherent limitations in any accounting and internal control system, non-compliances may nevertheless occur and not be detected.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on management’s compliance.

OPINION

In our opinion,

(a) proper accounting and other records have been kept, including records of all assets of the Authority whether purchased, donated or otherwise;

(b) the financial statements are in agreement with the accounting and other records and are prepared on a basis similar to that adopted for the preceding year; and

(c) the receipts, expenditure, investment of moneys and the acquisition and disposal of assets by the Authority during the year are, in all material respects, in accordance with the provisions of the Act.

NOTES TO THE FINANCIAL STATEMENTS

For the financial year ended 31 March 2012

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

1 GENERAL

The Urban Redevelopment Authority (the “Authority”) is a statutory board established in Singapore under the Urban Redevelopment Authority Act (Cap. 340). The supervisory ministry is the Ministry of National Development. The Authority is domiciled in Singapore. The address of its registered office is as follows:

45 Maxwell Road
The URA Centre
Singapore 069118

The principal activities of the Authority are:
(a) planning and facilitating the physical development of Singapore;
(b) selling and managing land for the government;
(c) managing car parks;
(d) undertaking development projects on behalf of the government and other organisations; and
(e) carrying out such other functions as imposed upon the Authority by or under the Urban Redevelopment Authority Act (Cap. 340) or any other written law.

These financial statements are presented in Singapore Dollar, which is the Authority’s functional currency.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of accounting and adoption of new and revised standards

The financial statements have been prepared in accordance with the historical cost basis, except as disclosed in accounting policies below, and are drawn up in accordance with the provisions of the Urban Redevelopment Authority Act (Cap. 340) and Statutory Board Financial Reporting Standards (“SB-FRSs”).

In the current financial year, the Authority has adopted all the new and revised SB-FRSs and Interpretations of SB-FRSs (“INT SB-FRSs”) that are relevant to its operations and effective for annual periods beginning on or after 1 April 2011. The adoption of these new and revised SB-FRSs and INT SB-FRSs does not result in changes to the Authority’s accounting policies and has no material effect on the amounts reported for the current or prior years except as disclosed below:

SB-FRS 24 Related Party Disclosures

SB-FRS 24 Related Party Disclosures is effective for annual periods beginning on or after 1 January 2011. The Standard clarifies the definition of a related party and consequently additional parties may be identified as related to the reporting entity.

In addition, the Standard provides partial exemption for government-related entities, in relation to the disclosure of transactions, outstanding balances and commitments. Where such exemptions apply, the reporting entity has to make additional disclosures, including the nature of the government’s relationship with the reporting entity and information on significant transactions or group of transactions involved.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Financial instruments (continued)

(a) Financial assets (continued)

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except those maturing more than 12 months after the end of the reporting period which are classified as non-current assets. Loans and receivables are classified within “Cash and cash equivalents”, “Staff loans” and “Debtors, accrued interest, prepayments and other debtors” on the Statement of Financial Position. Loans and receivables are measured at amortised cost using the effective interest method less impairment. Interest is recognised by applying the effective interest rate method, except for short-term receivables when the recognition of interest would be immaterial.

(ii) Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. Assets in this category are classified as current assets if they are expected to be realised within 12 months after the end of the reporting period.

(iv) Impairment of financial assets

Financial assets, other than those at fair value through profit or loss, are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired where there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted.

For financial assets carried at amortised cost, the amount of the impairment is the difference between the asset’s carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables where the carrying amount is reduced through the use of an allowance account. When a trade receivable is uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

(b) Financial liabilities and equity instruments

(i) Classification as debt or equity

Financial liabilities and equity instruments issued by the Authority are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

(ii) Creditors

Creditors are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest method.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.2 Financial instruments (continued)

(b) Financial liabilities and equity instruments (continued)

(ii) Equity instruments

 Shares issued to Minister for Finance are classified as equity. Any incremental costs directly attributable to the issuance of new shares are deducted against the capital account.

(iv) Derecognition of financial liabilities

 The Authority derecognises financial liabilities when, and only when, the Authority’s obligations are discharged, cancelled or they expire.

(c) Fair value of financial assets and financial liabilities

The fair values of current financial assets and liabilities, carried at amortised cost approximate their carrying amounts.

The fair values of financial instruments other than unit trusts are based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Authority is the current bid price; the appropriate quoted market price for financial liabilities is the current ask price.

The fair value of the unit trusts is determined based on the funds’ net asset values provided by the fund managers at the last market day of the financial year. The net asset values approximate the fair value as the fund comprise mainly quoted equities and bonds whose fair values are based on the quoted market prices at the last market day of the financial year.

The fair value of forward exchange currency contracts is determined using forward foreign exchange market rates at the end of the reporting period.

The Authority classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

(i) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);

(ii) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2); and

(iii) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

There were no transfers between Level 1 and Level 2 of the fair value hierarchy during the financial year.
2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

2.3 Forward foreign exchange contracts
Forward foreign exchange contracts are classified as financial assets/liabilities at fair value through profit or loss. A forward foreign exchange contract is initially recognised at fair value on the date it is entered into and is subsequently re-measured at fair value.
Changes in fair value of forward foreign exchange contracts are included in the profit or loss in the financial year in which the changes in fair value arise.

2.4 Operating leases
Leases of assets where substantially all risks and rewards incidental to ownership are retained by the lessors are classified as operating leases. Receipts and payments made under operating leases are recognised in the profit or loss on a straight-line basis over the period of the lease.
Assets leased out under operating leases are included in property, plant and equipment.

2.5 Property, plant and equipment
(a) Measurement
Property, plant and equipment are initially recognised at cost and subsequently carried at cost less accumulated depreciation and accumulated impairment losses.

The cost of an item of property, plant and equipment initially recognised includes its purchase price and any cost that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the Authority.

(b) Depreciation
Depreciation is calculated using the straight-line method to allocate their depreciable amounts over their estimated useful lives as follows:

<table>
<thead>
<tr>
<th>Useful lives</th>
<th>Over the lease period of 99 years</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>IT equipment</td>
<td>3 to 5 years</td>
</tr>
<tr>
<td>Other assets</td>
<td>3 to 10 years</td>
</tr>
</tbody>
</table>

2.6 Impairment of assets
At the end of each reporting period, the Authority reviews the carrying amounts of its assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Authority estimates the recoverable amount of the cash-generating unit to which the asset belongs.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss is subsequently reversed, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.
2.7 Provisions
Provisions are recognised when the Authority has a present obligation (legal or constructive) as a result of a past event, it is probable that the Authority will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provision for pensions and gratuities is made for the payment of pension benefits to pensionable officers under the provisions of the Pensions Act (Cap. 225) and to eligible staff employed under the contract scheme.

The cost of pension benefit due to pensionable officers is determined based on the expected payouts to be made by the Authority in respect of services rendered by these pensionable officers up to the end of the reporting period. The provision is dependent on the length of service, pensionable salary and estimated life expectancy of the pensionable officers.

2.8 Income recognition
Income comprises the fair value of the consideration received or receivable for the sale of goods and rendering of services in the ordinary course of the Authority’s activities. Income is presented, net of goods and services tax, rebates and discounts.

(a) Rendering of services
Revenue from rendering of services, including income from development control, agency and consultancy fees and recovery of costs is recognised during the financial year in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion of the total services to be performed.

(b) Parking fees and related charges
Season parking fees are accounted for on a time proportion basis. Other parking fees and related charges are accounted for when transacted.

(c) Interest income
Interest income is recognised on a time proportion basis using the effective interest method.

(d) Dividend income
Dividend income is recognised when the right to receive payment is established.

(e) Rental income
Rental income from operating leases on property, plant and equipment is recognised on a straight line basis over the lease term.

2.9 Employee compensation

(a) Defined contribution plans
Defined contribution plans are post-employment benefit plans under which the Authority pays fixed contributions into separate entities such as the Central Provident Fund on a mandatory, contractual or voluntary basis. The Authority has no further payment obligations once the contributions have been paid. The Authority’s contributions are recognised in profit or loss when they are due.

(b) Employee leave entitlement
Employee entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the end of the reporting period.

2.10 Foreign currency transactions and translation
Transactions in a currency other than the functional currency (“foreign currency”) are translated into the functional currency using the exchange rates at the dates of the transactions. Currency translation differences from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the closing rates at the end of the reporting period are recognised in profit or loss.

2.11 Cash and cash equivalents
Cash and cash equivalents include cash on hand and deposits with financial institutions which are subject to an insignificant risk of changes in value.

3 CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY
The preparation of financial statements in conformity with SS-FRS requires management to exercise judgement in the process of applying the accounting policies. It also requires the use of accounting estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenditure and disclosure of contingent assets and liabilities in the financial statements. Although these estimates are based on management’s best knowledge of current events and actions, actual results may ultimately differ from those estimates. Significant areas of estimation and management judgement with regard to the estimation of useful life for the property, plant and equipment are as disclosed in Notes 2.5 (b) and 5.
4 FINANCIAL RISKS AND CAPITAL RISKS MANAGEMENT

The main risks arising from the Authority’s activities are market risk (including currency, interest rate and price risks), credit risk and liquidity risk. There has been no change to the Authority’s exposure to these financial risks or the manner in which it manages and measures the risk.

4.1 Market risk

(a) Foreign currency risk

The Authority has exposure to foreign exchange risk as a result of investments in foreign currency denominated assets and liabilities. The main foreign currency for these investments is the US Dollar. Foreign currency contracts are used to hedge foreign exchange exposure as and when required. Disclosure of significant financial assets and liabilities denominated in currencies other than Singapore Dollar is disclosed in Notes 9 and 10 of the financial statements.

Sensitivity analysis

A 10% weakening/strengthening in the Singapore dollar against the US Dollar with all other variables being held constant is expected to increase/decrease the net surplus of the Authority by $2,066,427 (31 March 2011: $2,019,037).

Management is of the view that the above sensitivity analysis may not be representative of the inherent foreign exchange risk as year end exposure may not reflect the actual exposure and circumstances during the year.

(b) Interest rate risk

As the Authority maintains most of its cash and cash equivalents with the Accountant-General’s Department (“AGD”) under the Centralised Liquidity Management (“CLM”) and the Statutory Board Approved Fund (“SBAF”) and does not have any interest bearing liabilities, its exposure to interest rate risk is insignificant. The interest rates for cash under the CLM are based on deposit rates determined by the financial institutions with which the cash are deposited and are expected to move in tandem with market interest rate movements. There is no interest earned for cash under the SBAF.

(c) Price risk

The Authority is exposed to price risk arising from financial assets at fair value through profit or loss and available-for-sale financial assets.

Further details of these investments can be found in Note 9 to the financial statements.

Sensitivity analysis

In respect of financial assets at fair value through profit or loss, except bonds, if prices increased or decreased 5% with all other variables being held constant, the Authority’s net surplus for the year ended 31 March 2012 would increase/decrease by $13,929,000 (31 March 2011: $13,940,000).

In respect of bonds classified as held for trading, if the interest rate decreased/increased by 50 basis point, and all other variables being held constant, the Authority’s net surplus for the year ended 31 March 2012 would increase/decrease by $3,411,000 (31 March 2011: $3,743,000).

In respect of available-for-sale financial assets, no sensitivity analysis has been prepared as management is of the view that money market funds are not subjected to significant price risk.

4.2 Credit risk

Credit risk arises from transactions with debtors and financial institutions. The maximum exposure at the end of the financial year, in relation to each class of financial asset is the fair value of those assets in the Statement of Financial Position.

Cash and cash equivalents, unit trusts, equities and available-for-sale financial investments are placed or transacted with high credit quality financial institutions. Bonds held for investment are of at least a Moody’s grading of Ba1-3 or its equivalent. Cash with AGD are placed with high credit quality financial institutions, and are available upon request.

There is no significant concentration of credit risk except as disclosed in Note 8 where the major customers are government bodies. There is also consistent monitoring of the credit quality of the customers.
4 FINANCIAL RISKS AND CAPITAL RISKS MANAGEMENT (continued)

4.3 Liquidity risk

In managing the liquidity risk, the Authority ensures that it maintains sufficient cash and flexibility in funding to finance its operations.

Liquidity risk analysis

The following table details the remaining contractual maturity of the Authority’s financial liabilities (including derivative financial liabilities). The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Authority can be required to pay. The table includes both interest and principal cash flows.

4.4 Capital risk management policies and objectives

The capital structure of the Authority consists of capital account and accumulated surplus. The Authority manages its capital to ensure it will be able to continue as a going concern. The Authority’s overall strategy remains unchanged from last financial year.

| At 31 March 2012 | 21,840 | 39,562 | 28,366 | 32,733 | 19,485 | 8,103 | - | 150,089 |

Net book value

| At 31 March 2012 | 131,311 | 77,277 | 10,169 | 3,825 | 4,905 | 11,488 | 2,443 | 241,418 |

Land parcels with reversionary interest from past sale of sites were not included in the above assets schedule as these are carried at zero cost as management is of the view that it is difficult to reliably estimate the final future value of these lands when they are reverted back to the Authority in due course. As at 31 March 2012, the Authority had a total of 46 land parcels (31 March 2011: 46 land parcels) of which 42 land parcels (31 March 2011: 42 land parcels) were with nominal value of $1 each. These are land parcels that have 4 years or less of reversionary interest. The value of the other 4 land parcels (31 March 2011: 4 land parcels) with longer reversionary interest was estimated at $11,799,000 (31 March 2011: $8,274,000). The Authority’s in-house professional value has estimated the value, based on current market conditions, by discounting the future value of the 4 land parcels to its present value based on the remaining number of years of the unexpired land sale tenure.
6 INFRASTRUCTURAL PROJECTS-IN-PROGRESS

The Authority has taken on a more proactive role to make Singapore more attractive and competitive by facilitating the development of strategic areas through more active value enhancing initiatives. The project costs incurred by the Authority are recognised as an asset on the Authority’s Statement of Financial Position as its accumulated surplus is used to fund these projects. As at 31 March 2012 and 2011, the amounts incurred were mainly for environmental improvement projects at Punggol Promenade, Labrador Coast and Woodlands Waterfront. On completion of the infrastructural projects, the assets will be transferred to the designated government agencies as a contribution to the government, with a corresponding reduction against the Authority’s accumulated surplus.

8 DEBTORS, ACCRUED INTEREST, PREPAYMENTS AND OTHER DEBTORS

The Authority’s debtors are mostly government agencies, other statutory boards and its parent ministry, Ministry of National Development. A majority of the Authority’s operating debtors and recoverables are neither past due nor impaired and are due from the Ministry of National Development. The credit period given to the Authority’s debtors is 30 days (31 March 2011 : 30 days).
8 DEBTORS, ACCRUED INTEREST, PREPAYMENTS AND OTHER DEBTORS (continued)

The ageing analysis of operating debtors past due and not impaired is as shown below. No allowance has been made on these debtors as management believes that there has not been significant change in credit quality and the amounts are still considered recoverable.

<td>($78)</td>
</tr>
<tr>
<td></td>
<td>$485,971</td>
<td>$487,412</td>
</tr>
</tbody>
</table>

9 OTHER FINANCIAL ASSETS/(LIABILITIES) (continued)

(a) At the end of the reporting period, financial assets/(liabilities) at fair value through profit or loss comprised financial assets/(liabilities) classified as held for trading and designated as at inception of $365,745,000 and $120,226,000 respectively (31 March 2011: $358,007,000 and $124,383,000 respectively).

(b) Bonds included in quoted marketable securities had a weighted average effective interest rate of 0.87% per annum (31 March 2011: 1.62% per annum).

(c) Foreign exchange contracts are used to hedge foreign exchange risks arising from investments in some quoted bonds and equities. The notional principal amounts of outstanding forward foreign exchange contracts of the Authority as at 31 March 2012 is $183,029,000 (31 March 2011: $150,511,000).

Total outstanding foreign exchange contracts comprise mainly contracts involving US Dollar and Euro, with notional principals which amounted to $117,646,000 and $22,129,000 respectively as at 31 March 2012 (31 March 2011: US Dollar and Euro of $100,028,000 and $22,789,000 respectively).

At 31 March 2012, the settlement dates on forward foreign exchange contracts ranged between 0.10 and 29.66 months (31 March 2011: between 0.62 and 41.69 months).

(d) Investments denominated in foreign currencies amounted to $209,338,000 as at 31 March 2012 (31 March 2011: $210,646,000). The foreign currency exposure arises primarily from the Authority’s investment in unit trusts, global bonds and equity shares of which approximately 78% and 9% (31 March 2011: approximately 65% and 10%) are denominated in US Dollar and Euro respectively. The remaining investments are held in various currencies which are individually not significant.

(e) The financial assets at fair value through profit or loss included an investment portfolio managed internally amounting to $120,226,000 (31 March 2011: $124,383,000). The portfolio comprised mainly corporate and agency bonds, foreign government securities and other Singapore statutory boards’ bonds.
9 OTHER FINANCIAL ASSETS/(LIABILITIES) (continued)

(f) Financial assets/(liabilities) managed by external fund managers comprised the following:

<table>

* These items have been included in the respective current assets and liabilities categories in the Statement of Financial Position.

10 CASH AND CASH EQUIVALENTS (continued)

(a) Included in cash and bank balances was an amount of $19,696,000 (31 March 2011: $55,088,000) relating to collections on behalf of Ministry of National Development and other government agencies, and classified as part of “Creditors and accrued operating expenses” (Note 13) and “Agency and other deposits”.

(b) Cash with the Accountant-General’s Department (AGD) comprises $160,399,000 (31 March 2011: $133,253,000) that are managed by AGD under the Centralised Liquidity Management (CLM) and $206,519,000 (31 March 2011: $426,156,000) managed under the Statutory Board Approved Funds (SBAF). Under the CLM, cash is managed centrally to achieve greater efficiency. Under the SBAF, funds approved for infrastructural projects are placed with AGD and will not be subject to dividend payment (Note 25).

(c) Cash and cash equivalents denominated in foreign currencies amounted to $480,000 (31 March 2011: $1,092,000) and were denominated mainly in British Pound, US Dollar and Japanese Yen (31 March 2011: British Pound, Taiwan Dollar and US Dollar). The cash in foreign currencies were held in relation to the Authority’s investment in quoted equity shares and bonds.

11 DEFERRED INCOME

This represents the portion of agency fees received on sale of sites which are deferred for services to be performed in future financial years.

</tbody>
</table>

15 CAPITAL ACCOUNT

The balance in this account represents:

(a) the value of certain leasehold land of the former Urban Renewal Department under the Ministry of National Development and some adjacent state land vested in the Authority when it was established;

(b) the net book value of movable assets transferred from the former Planning Department and the Research and Statistics Unit under the Ministry of National Development upon their amalgamation with the Authority on 1 September 1989; and

(c) 1,000 shares of one dollar each issued to the Minister for Finance, a body corporate incorporated by the Minister for Finance (Incorporation) Act (Cap. 183) for equity injection of $1,000 on 23 February 2000.

16 RECOVERY OF COSTS

<table>

<td>$208</td>
</tr>
</tbody>
</table>
17 AGENCY AND CONSULTANCY FEES
The Authority sells and manages land for the government, manages car parks and undertakes development projects on behalf of the government and earns agency and consultancy fees from these services provided.

18 INCOME FROM DEVELOPMENT CONTROL
The income from development control includes sale of approved plans, search fees, lodgement fees and development application processing fees collected under subsidiary legislation made under the Planning Act (Cap. 222) and administrative charges for planning clearance for projects submitted by government departments and ministries.

19 PARKING FEES AND RELATED CHARGES
Included in parking fees and related charges is income from the sale of car park coupons. The Authority operates the common car park coupon system jointly with Housing and Development Board ("HDB") from 1 September 1981. The total annual coupon sales proceeds is shared between the Authority and HDB based on management’s best estimate of the usage of coupons in the car parks managed by each party using an agreed sharing formula. Each party’s share of the coupon sales proceeds is subject to adjustment that may arise from joint coupon income surveys carried out at periodic intervals that are mutually agreed by both parties.

20 EXPENDITURE ON MANPOWER

<table>

</tr>
</tbody>
</table>

*Investments comprise financial assets at fair value through profit or loss and available-for-sale financial assets (Note 5).

24 FUNDING FOR GOVERNMENT PROJECTS
The Authority provides funding for government projects which are implemented by government agencies under the programme to develop Singapore into a vibrant and distinctive global city. This amount was recorded as a reduction in the Authority’s accumulated surplus during the financial year as this was a contribution to the government. Out of the $204,030,000 (2010/2011 : $12,113,000) incurred during the year, $203,149,000 (2010/2011 : $11,839,000) was to fund the Gardens by the Bay project.
DIVIDEND PAID

A dividend of $26,815,000 was paid to the Minister for Finance, a body corporate incorporated by the Minister for Finance (Incorporation) Act (Cap. 183), in respect of the results for the financial year ended 31 March 2011 (2010/2011: $1,328,000).

COMMITMENTS

(a) Capital commitments

Capital expenditures contracted for at the end of the reporting period but not recognised in the financial statements are analysed as follows:

<table>
<thead>
<tr>
<th></th>
<th>2012</th>
<th>2011</th>
</tr>
</thead>
<tbody>
<tr>

<td>18,217</td>
</tr>
</tbody>
</table>

SIGNIFICANT RELATED PARTY TRANSACTIONS

The Authority is a statutory board domiciled in Singapore under the Urban Redevelopment Authority Act (Cap. 340) (Note 1). As a statutory board, all Government ministries, organs of state and statutory boards are deemed related parties of the Authority.

The Authority had the following significant transactions with its supervisory Ministry, Ministry of National Development, and other related parties during the year:

<table>
<thead>
<tr>
